

SEVA

SAINT-GOBAIN

INDUSTRIAL EXPERTISE
for efficient **solutions**

Engineering | Foundry | Machining | Mechanics

SEVA, a Saint-Gobain brand

Founded in 1926, SEVA is a Saint-Gobain subsidiary, an internationally renowned French group.

2 SITES

in Burgundy, France

Nearly

24 000

m² of covered area

280

employees

SEVA, efficient, innovative,
custom-made solutions

Flexible and proactive SEVA teams are entirely focused on customer projects and offer innovative solutions that create value.

MISSION

Being a trusted partner to our industrial customers for :

- development and supply of high-quality technical solutions and complex production equipment,
- support in the industrialization of their proprietary and strategic manufacturing processes.

FIELDS OF ACTIVITY

High-tech and
demanding markets

Aircraft & space

Automotive

Chemistry

Energy

Housing

Nuclear

CERTIFICATIONS

Management systems and performances
certified to the most demanding standards

SEVA
SAINT-GOBAIN

SEVA, a wide range of resources and know-how

SCIENCE OF METALLURGY and foundry (R&D).

MACHINING

by material removal: turning, milling, electro-erosion, electron-beam drilling etc.

DESIGN, ENGINEERING INDUSTRIALISATION

Robotics, cobotics, automation, thermics, calculations, industrial vision and industrial data processing.

FOUNDRY

Casting of technical parts in alloys and superalloys such as stainless steels, refractory steels, nickel or cobalt based alloys etc.

PROVIDING GLOBAL SERVICES

SEVA offers a complete service, from the study to the final realization, to meet the technical and economic challenges of its customers in France and abroad.

Partner in your industrial challenges

SEVA,
high
expertise
professions

SEVA's activity is
organized in 3 units

MECHANICS, MECHATRONICS AND HYDRAULICS

ASSOCIATED SERVICES AND SPECIAL PROCESSES

Heat treatments, surface treatments,
welding, dimensional controls, NDT etc.

MANUFACTURING, ASSEMBLY

and commissioning on site
of mechanical assemblies
and complete customized
industrial equipment,
integrated into the process
of its customers.

INDUSTRIAL TOOLS AND SPECIAL PRODUCTS

Developing and producing special alloys
elaborated within its integrated foundry.
Machining strategic parts with
complex shapes.

■ *Alloys & Transformation*

DESIGN AND PRODUCTION OF INDUSTRIAL EQUIPMENT

Designing, manufacturing and installing proprietary
equipment for our customers' industrial processes.

■ *SYSPRO*

CLOSURE SOLUTIONS

Designing, manufacturing and distributing mechanical
and mechatronic devices for door equipment.

■ *SEVAX*

SINGLE POINT OF CONTACT

SEVA offers a support system with a project manager who coordinates
the implementation in collaboration with expert teams.

SEVA, flexibility close to
the customers' business

QUALITY CONTROL

Coordinating the implementation of reliable solutions.

COST OPTIMIZATION

Adopting an effective organization to ensure that objectives are met.

COMPLIANCE WITH LEAD-TIMES

Optimizing the organization to ensure that deadlines are met at each stage of the project.

CONFIDENTIALITY

Establishing a trustful relationship to develop strategic and value-creating innovations.

PERFORMANCE

Expert teams with unique know-how and advanced technologies.

INNOVATION

Developing and implementing innovative technological solutions.

CUSTOMER PROXIMITY

Involvement in sustainable partnerships with our customers and development of tailor-made processes.

RESPONSIBILITY

Being committed players in social, societal and environmental issues.
